SUMMARY

Full Stack Developer with 3+ years of experience (internships, freelance client work, and full-time roles) building and deploying production web applications with React, Next.js, Node.js, and Laravel, plus hands-on Retrieval-Augmented Generation (RAG) engineering — custom chunking, embeddings, and Pinecone vector search — backed by an HEC/NCEAC-certified Generative AI Application Developer credential (Top Performer, 2026). Skilled in cloud deployment and DevOps, including AWS EC2, Azure Virtual Machines, Azure DevOps, and CI/CD pipelines with GitHub Actions. Delivered 25+ projects including a multi-tenant AI support platform, a paid hotel booking platform for an international client, and a Fiverr-style freelance marketplace deployed on AWS with CI/CD.
Currently a Full Stack Developer at an AI/ML-focused software house, seeking new opportunities to contribute to scalable, AI-enabled web applications.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR, App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap 5, Responsive Design

Backend: Node.js, Express.js, Laravel 11/12, REST APIs, JWT Authentication, Event-Driven Architecture

Databases: MongoDB, MySQL, Database Design

Cloud & DevOps: AWS (EC2), Microsoft Azure (Virtual Machines, Azure DevOps), CI/CD Pipelines, GitHub Actions, n8n Automation

AI/ML: Retrieval-Augmented Generation (RAG), Vector Search (Pinecone), OpenAI & Groq SDKs, Embeddings, AI Agent Workflows, AI Chatbot Integration

Tools & Practices: Git/GitHub, VS Code, Postman, Figma, Agile Workflows, Code Reviews

CERTIFICATIONS

Generative AI Application Developer Certificate — NCEAC/HEC Generative AI Training Cohort 2, Top Performer (2026)

- Issued by UETIANS Lahore Endowment Foundation (USA); HEC/NCEAC-backed; verifiable (Certificate ID 068c44dd77b77ef2)

PROJECTS

NeuralDesk – Multi-Tenant AI Customer Support Platform | *Node.js, Express, MongoDB, Next.js, Pinecone, OpenAI & Groq SDKs, Socket.io*

- Built a multi-tenant RAG pipeline from scratch: PDF/DOCX ingestion, custom chunking, OpenAI embeddings, and Pinecone vector search, with Groq-powered answers citing source documents
- Implemented real-time chat via Socket.io, role-based multi-tenant access (admin/agent/customer), an embeddable support widget, and a visual automation flow builder

FreelanceHub – Freelance Marketplace Platform | *React, Node.js, Express, MongoDB, Stripe, AWS EC2, CI/CD*

- Built a production-ready, Fiverr-inspired freelance marketplace with real-time chat and Stripe payment integration
- Deployed application on AWS EC2 with an automated CI/CD pipeline using GitHub Actions

Employee Management System | *React, Node.js, Express, MongoDB, JWT*

- Developed a full-stack MERN employee and task management system with JWT authentication and role-based access control (RBAC)

Offlow – Company Project | *Next.js, React, Figma*

- Built the frontend using Next.js (SSR, App Router) based on Figma designs as part of professional work

LinkedIn Post Automation | *n8n, MongoDB, AI Agent, WhatsApp API, LinkedIn API*

- Designed an end-to-end automation workflow using n8n that pulls raw data from MongoDB, generates a post and image using an AI agent, sends it via WhatsApp for approval, and automatically publishes it to LinkedIn

SugarHills – Hotel Booking Platform | *React (TypeScript), Node.js, Express, MongoDB, JWT, Tailwind CSS*

- Paid freelance project for an international client (Kerala, India); built a complete dynamic website for a luxury resort with an admin panel to manage content

Inventory Management System | *React, TypeScript, Tailwind CSS, Recharts, Vite (frontend) + Laravel 12, Sanctum (API)*

- React/TypeScript dashboard (products, orders, stock, reports) + Laravel 12 REST API, Sanctum auth

EXPERIENCE

Full Stack Developer, Techling Jun 2026 – Present
Sheikhupura, Pakistan

- Working as a Full Stack Developer at an AI/ML-focused software house, developing full-stack features for client projects
- Converted from a 3-month paid internship to full-time after a successful performance evaluation (Oct 2026)

Full Stack Developer, Sky Waves Software House Apr 2026 – May 2026
Sheikhupura, Pakistan

- Developed client projects using Laravel 12 and MySQL; built REST APIs and secure authentication systems
- Converted from intern to full-time based on performance; delivered production-ready features

Backend Developer Intern, Sky Waves Software House Jan 2026 – Mar 2026
Sheikhupura, Pakistan

- Built backend modules for web applications using Laravel and Node.js

Freelance Web Developer Oct 2023 – Present

- Delivered SugarHills resort booking platform for a client in Kerala, India

Junior Web Developer Intern, RISS (Remote IT Services & Solutions) Jun 2023 – Nov 2023
Sheikhupura, Pakistan (Remote)

- Completed web development training, then contributed to live client projects as an intern — first professional development experience

EDUCATION

BS Information Technology, University of the Punjab Completed 2026 (2022 – 2026)
